

OUR GREEN POLICY

At Cranmer Country Cottages our green ethos is central to our sustainable operational approach. We care about our natural environment and it has always been important to us that we work with nature rather than against it. We are committed to continuous improvement of our environmental performance and reduction of our carbon footprint, as we work to achieve carbon neutrality within our business.

We....

- Comply with environmental legislation and approved codes of practice.
- Commit to legal compliance including the Equality Act 2010 and the modern slavery Act 2015
- Participate in the Green Tourism Scheme; we are Gold Award holders.
- Produce as much of our own energy onsite from Earth, wind sun & wood.
- Reduce consumption of energy, water, and other resources.
- Recycle and reuse as much business-generated waste as possible through our onsite recycling area and donations to local charity shops.
- Source good quality local products and services where possible.
- Expect similar environmental standards from suppliers and contractors.
- Look towards sustainable procurement i.e., replacing white goods with energy-efficient & water-efficient appliances and devices.
- Actively help support and promote diversity within our business and on our farm through membership in the Countryside Stewardship Scheme
- Sponsor our local community nature reserve at Sculthorpe Moor.
- Continuously seek to improve our environmental and social performance.
- Engage and train our employees to help us maintain our green ethos.
- Encourage our guests to join us in our sustainable efforts through information on our website, visitor guides, and notices around site.
- Revisit our green objectives through seasonal reappraisals of our Green Action plan as part of our team briefings.
